

GOZ Token Tutorial

In order to use anything on the Ethereum network a person needs to have an Ethereum account. The easiest way to do this at the moment, is with [MyEtherWallet](#)

Generate an Ethereum Account

Step 1

MyEtherWallet Open-Source & Client-Side Ether Wallet · v3.6.0 English

Generate Wallet Send Ether & Tokens Swap Send Offline Contracts View Wallet Info Help

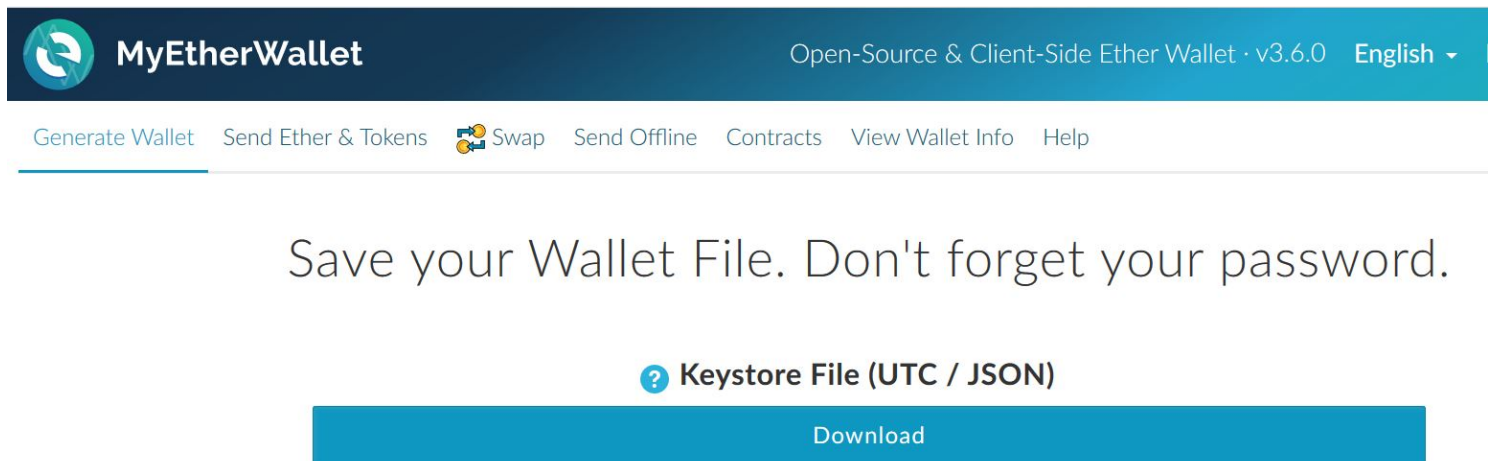

Generate Wallet

Enter a strong password (at least 9 characters)

Do NOT forget to save this!

Generate Wallet

Click on Generate Wallet and enter a good password. You will always be able to regenerate the same account from the same password.

MyEtherWallet Open-Source & Client-Side Ether Wallet · v3.6.0 English

Generate Wallet Send Ether & Tokens Swap Send Offline Contracts View Wallet Info Help

Save your Wallet File. Don't forget your password.

? Keystore File (UTC / JSON)

Download

Click download and save the **json** file **BUT keep this file safe and private. Any person who gets their hands on this file can now access your account, so store it safely.**

```

{
  "Crypto": {
    "cipher": "aes-128-ctr",
    "cipherparams": {
      "iv": "c0e449bacff7e96ad2f1ffcec035e5d5"
    },
    "ciphertext": "7acd62c344c132a6394bd893925ce6f7dcc8e1a309ef3fdb38add9dc36ed222a",
    "kdf": "scrypt",
    "kdfparams": {
      "dklen": 32,
      "n": 1024,
      "p": 1,
      "r": 8,
      "salt": "c79da7b89163fb483fbb3387dae90bd8d9b8aecfc3d4b96654a81d72cd179c71"
    },
    "mac": "67e77a11735714ba5447a2a8487a2f624a6a1055c70ce6edf59cee76f23ff5fe"
  },
  "address": "c0d3ca408fcec7672f1efa8faf119a39634a94eb",
  "id": "8cf7ba3c-9b7f-40b4-a771-5a91a9ea408d",
  "version": 3
}

```

Open the file and look at **ciphertext**. This value is your private key. **This private key is the part that MUST be kept secret.**

? Message

This is user kvhnuke on reddit. The purpose of this message is to prove that 0x7cB57B5A97eAbe94205C07890BE4c1aD31E486A8 is my address.

Now you can access your Ethereum account! It is here that you will find your Ethereum address, view the balance that this account has in it, view any tokens that it has, and other interesting things also.

Get Ether

As you can see, new accounts do not hold any Ether and you will have to get some.

[Generate Wallet](#) [Send Ether & Tokens](#) [Swap](#) [Send Offline](#) [Contracts](#) [View Wallet Info](#) [Help](#)

Current Rates

1	ETH = 0.034938 BTC	1	BTC = 27.386756 ETH
1	ETH = 4.358901 REP	1	BTC = 117.481203 REP

I want to swap my ETH ▾ for BTC ▾

Let's do this!

Click on the **Swap** tab at the top of the page to exchange your bitcoins for Ether. Alternatively you may use [ShapeShift](#)

Exchange for GOZ Tokens

Once you have some Ether, you are ready to exchange those Ether for **GOZ Tokens!**

The GOZToken smart contract is an Ethereum ERC20 compliant token, which means that you can exchange GOZ tokens on any Ethereum based exchange.

The address of the GOZToken is at: **0x7bcad73c4e06ab9c74c0b78903dbdf572cc0a49c (TEST)**

The source code of the GOZToken can be found at:

<https://github.com/RFVenter/GOZ-token/blob/master/contracts/Token.sol>

To purchase GOZ tokens during the ICO phase you will have to use another smart contract which has been designed to sell tokens at the correct price during this time.

The address of the TokenPurchase is at: **0xb0028c15726ba8ea2fe0e8a3ffd4a2b565744888 (TEST)**

The source code of the TokenPurchase can be found at:

<https://github.com/RFVenter/GOZ-token/blob/master/contracts/TokenPurchase.sol>

To exchange Ether for GOZ tokens you simply have to send the amount of Ether you wish to convert to GOZ tokens, to the TokenPurchase smart contract at **0xb0028c15726ba8ea2fe0e8a3ffd4a2b565744888 (TEST)**. The smart contract will automatically allocate your tokens to your Ethereum address.

Congratulations, you now have GOZ tokens!

Check your GOZ Tokens

Use GOZToken smart contract and Tokens

Once you have GOZ Tokens you can do several things with it. Since this is an ERC20 compliant token you can basically exchange GOZ tokens on any Ethereum exchange, and there are several. You can exchange them for other tokens, or sell them back to Ether at a later stage.

Read / Write Contract

startTime ▾

- name
- symbol
- totalSupply
- decimals
- startTime
- closeTime
- price
- allocationRatio
- balanceOf
- transfer
- approve
- transferFrom
- allowance

Now you can access all the public functions that this smart contract has. For more information about ERC20 complaint Tokens goto to [ERC20](#)

[illegible]

If you select price you can see that it has a lot of digits. Ethereum has high precision and uses 18 decimal standard precision.

balanceOf ▾

_owner address

0x314156...

↳ balance uint256

151

READ

The function shows you how many tokens your account has.

transfer ▾

_to address

0x314156...

_value uint256

151

WRITE

This function allows you to transfer your tokens to another Ethereum address, like your friends.

Conclusion

Using GOZ Tokens are fun and easy. If you need more information about Ethereum Tokens, just Google it.
